SERVICES webDesign

Hey! as i can serve many service WEB design is one of work i do with courage and as day to day i love programing job so as i do it, i develop responsive web site with using html, bootstrap javascript, react and node as backend. so you're welcome to hire me for best product you want. call me if you want good developer

 Web maintenance

As i develop new website also do not hestate to tell me what's wrong with your website, i maintain any developed web even if it developed by other developpers, and also if you have web with non-responsive pages do not hestate to call me. I solve all website issues.as long as technology increase also there is alot of service need to be online.

 phone & pc repairs

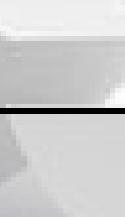

Apart from Web designing and web mantainance also i fix some problem as techcian where i fix telephone problem and computer problem so it's better to have device work correctly without any issues. do not hestate i have best servise and all things i do, it done as faster as possible. So welcome your device need to run in good condition with best health.

 Fix network issue

As this century many things doe via online we need to have good network with less interference is in that case apart from above service also network is one of service that i work also. i build good network with better installation where i install LAN, CAN and other different areas. come on be mature to have good technician call me any time you want support.
